

JM GO RISK DISCLOSURE

1. INTRODUCTION

Just Global Markets (MU) Limited, registration number 194590 GBC, address: The Cyberati Lounge, C/o Credentia International Management Ltd, Ground Floor, The Catalyst, Silicon Avenue, 40 Cybercity, 72201 Ebène, Republic of Mauritius, an Investment Dealer (Full Service Dealer, Excluding Underwriting) regulated by the Financial Services Commission (FSC) in Mauritius under a License number GB22200881 (hereinafter referred to as the "the Company" or "JM GO") is committed to providing transparent and comprehensive risk disclosures to its clients. This Risk Disclosure Policy is designed to inform clients of the potential risks associated with trading financial instruments, including Contracts for Difference (CFDs) and other leveraged products. The purpose of this document is to help clients make informed decisions based on their individual risk tolerance and financial situation.

Trading in financial markets carries significant risk, and it is possible to incur substantial losses. Clients should only trade with funds they can afford to lose and should carefully assess their investment objectives, experience, and risk appetite before engaging in any trading activity.

2. LEVERAGE RISK

Leverage enables traders to control larger positions with a relatively small initial investment. While this magnifies potential profits, it also increases potential losses. Clients should be aware that trading with high leverage can result in rapid depletion of funds, and, in some cases, additional capital may be required to maintain open positions.

3. MARKET RISK

Market conditions, including volatility and price fluctuations, may result in significant gains or losses. Economic events, political developments, and unforeseen global circumstances can influence asset prices and lead to unexpected market movements.

4. LIQUIDITY RISK

Certain financial instruments may experience reduced liquidity, making it difficult to enter or exit positions at desired prices. Market conditions, trading volumes, and external factors can impact liquidity, increasing the risk of slippage and wider bid-ask spreads.

5. FOREIGN EXCHANGE RISK

For trades conducted in a currency different from the client's base account currency, exchange rate fluctuations may impact overall profitability. Clients should be aware of the risks associated with currency conversion and potential adverse movements in exchange rates.

6. TECHNICAL AND OPERATIONAL RISKS

Trading platforms, servers, and communication networks are subject to technical failures, system malfunctions, and cyber threats. Connectivity issues, hardware failures, or software errors may lead to disruptions in trade execution, order processing, or account access. JM GO is not liable for losses arising from such technical failures beyond its control.

7. COUNTERPARTY AND CREDIT RISK

JM GO operates as a counterparty in OTC (over-the-counter) trading. If the Company experiences financial difficulties or insolvency, open positions may be closed or liquidated without prior notice. Clients should understand the credit risk associated with trading in non-exchange-traded instruments.

8. LEGAL AND REGULATORY RISK

Clients are responsible for ensuring that trading activities comply with applicable laws and regulations in their jurisdiction. Regulatory changes, government interventions, or policy shifts may impact trading conditions and the availability of financial instruments.

9. FORCE MAJEURE EVENTS

Unexpected external events, such as natural disasters, political unrest, pandemics, and cyberattacks, may disrupt market operations and impact trade execution. JM GO shall not be held responsible for financial losses caused by force majeure circumstances.

10. PSYCHOLOGICAL RISKS

Trading requires discipline, risk management, and emotional control. Psychological factors, such as fear, greed, and stress, can negatively impact trading decisions, leading to irrational behavior and potential financial losses.

11. RISK MITIGATION AND CLIENT RESPONSIBILITIES

Clients should adopt sound risk management strategies, including:

- Using stop-loss and take-profit orders to manage exposure.
- Diversifying investments to reduce overall risk.
- Regularly reviewing market conditions and staying informed about economic events.
- Maintaining sufficient margin requirements to prevent automatic liquidation of positions.
- Avoiding excessive leverage and assessing risk-reward ratios before placing trades.

Clients should also ensure they understand the functionality of the trading platform, read relevant legal documents, and update their contact information to receive timely notifications from JM GO.

12. NO GUARANTEES AND ACKNOWLEDGMENT OF RISK

JM GO does not guarantee any profits or returns from trading activities. Clients acknowledge that all trading decisions are made at their own risk, and they accept full responsibility for any gains or losses incurred.

By engaging in trading activities with JM GO, clients confirm their understanding of the risks outlined in this policy and acknowledge their obligation to trade responsibly.

For further inquiries, clients may contact our support team at support@jm-go.com.

Disclaimer: This document serves as an informational guide and does not constitute investment advice. Clients are encouraged to seek independent financial consultation before trading.
